

Michael Charles OKOUDJOU

Backend Developer & SaaS Builder

michy6133@gmail.com | <https://mchy.cloud> | <https://github.com/michy6133>
Cotonou, Benin

Profile

Backend Developer building real-world SaaS applications. Strong experience in Django, API design, and production deployment. Currently developing BizFlow, a business management platform deployed on a self-managed VPS using Docker and Dokku.

Skills

Backend: Python, Django, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps: Docker, Dokku, VPS Administration (Linux)

Other: Authentication (JWT), System Design, API Integration

Projects

BizFlow – SaaS Platform

<https://bizflow.mchy.cloud>

- Built a SaaS for business management (sales, inventory, team).
- Designed scalable APIs with Django & PostgreSQL.
- Deployed and managed on VPS using Docker and Dokku.
- Implemented authentication and role-based access.

Kakajam

<https://kakajam.mchy.cloud>

- Backend architecture and API integration for an artist platform.
- Automated workflows and platform logic.

Experience

Backend Developer & Platform Builder

- Built and deployed backend systems and APIs.
- Managed VPS infrastructure and production deployment.
- Optimized performance and ensured system reliability.
